

# WCG Empowers Oncology Sites to Reach Full Potential

Oncology sites are highly coveted, given their reputation for providing personalized care to patients in need. However, the question remains: How are sponsors supporting these sites to maximize capabilities, not just in terms of patient care, but also in optimizing data entry—an essential element for the success of oncology trials?

## CHALLENGE

A top 5 sponsor was falling behind on data entry for their global oncology portfolio, which included 130+ sites and 100+ protocols.

## RESULTS

WCG supported data entry and query resolution for 130+ sites, resolving data entry backlog in time for interim analyses.

In the past two years:

**100K+**

pages of data were entered

**80K+**

queries were resolved across all sites

## SOLUTION

Rapid deployment of WCG's study support enabled the conduct of tailored data entry by medical professionals with relevant oncology experience. All on-site and remote support was scaled to best optimize site performance. With dedicated oversight and management, data entry timelines were efficiently met on time or ahead of schedule.

“If only we could **CLONE** [the WCG Clinical Research Coordinator]; seriously one of the **very best** I have worked with in my 17 years in the industry!”
