

# The Most Experience + The Largest Site/Institution List

## A Winning Combination

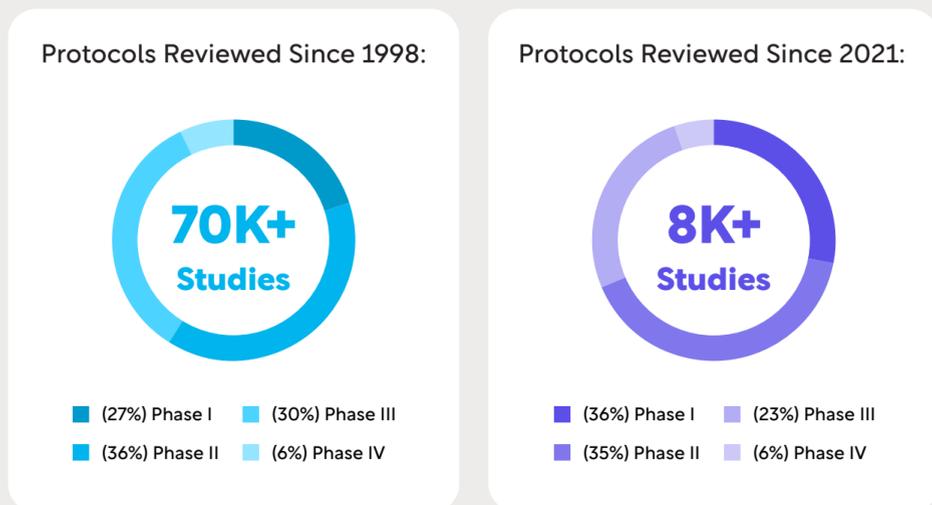

### A History of Unparalleled Expertise

Spanning the largest community of central sites & institutions of any central IRB, WCG's IRB has reviewed 70,000+ studies across nearly every therapeutic area in over 330,000 sites across North America over the past 25 years. In addition, we've amassed contractual partnerships with over 3,600 institutions. Our breadth of experience ensures something that no other IRB provider can offer: we know how to work with your sites, and they know how to work with us. By tapping into our partnerships, you gain unmatched expertise, one-of-a-kind insights, and a confident path to ensuring on-time study reviews. That's why 93% of all FDA-approved clinical therapies last year involved WCG!

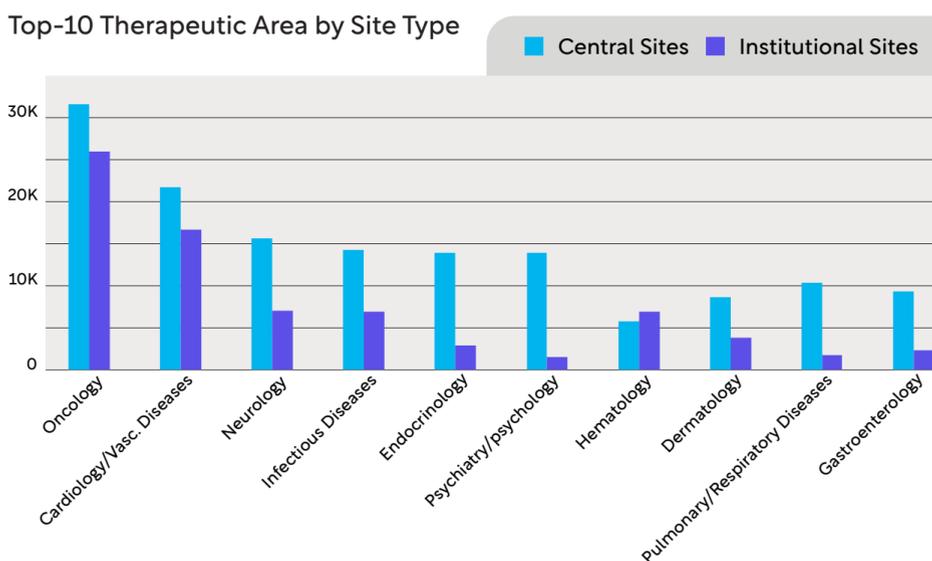

### The Largest Site Network Available

### WCG IRB Has the Most Experience

### WCG IRB Has the Most Expertise

### Our Comprehensive Site Experience Provides

- 1 Protocol consultations with WCG's bench of ethical and regulatory experts.
- 2 Cataloged site SOPs and templates enabling streamlined processes.
- 3 Single point of contact who knows your studies and manages your workflow.
- 4 Fully IBC registered sites with concurrent IRB & IBC protocol reviews.
- 5 Elimination of local IRB review with 3-5 day site approval times.

### The Benefits of Our Expertise

If you're running a clinical trial, we've worked with your sites. Learn how WCG can transform your study review by contacting us today!
